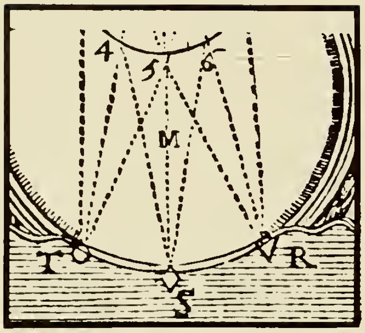
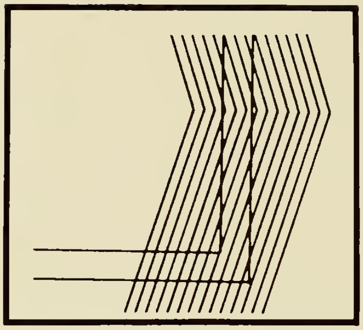
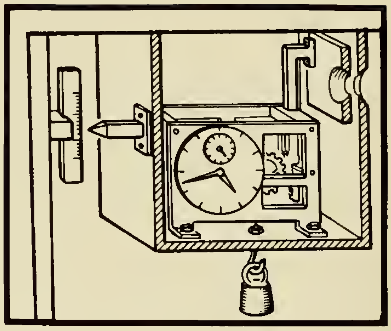
PERCEPTION







Perception is the unifying theme of the pictures and words in this yearbook and the four years of experience that they try to portray. It is not a concrete theme - it is hard to say in one word what the theme of this book is. It is as tangible or intangible as our own notions of what we have done or where we have been. It is subject to interpretation, to a variety of perceptions.

What follow are a few words on the *what, how* and *where* of our perceptions. (We will not tackle the *why.)*

What People perceive a lot of things: color, brightness, depth, smells and tastes, touch; we also have perceived time - a not unimportant aspect of a yearbook. But, for now, just sticking with the sensory, it is clear that we are biased toward the visual. We have a book of pictures rather than a set of cassette tapes or a collection of scratch-and-sniff cards (the stench of anatomy lab, the smog on Vine Street). So we have *photographs* to document our years at Hahnemann. But a photograph is just an approximation - and not even a very close one - of what was happening when it was taken. It is some lights and darks and colors which look like something or someone. But a photograph is so powerful! It is hard not to make too much *and* too little of a snapshot. It is an intriguing notion that a photographer alters every subject he photographs. Even if the subject is unaware, the photographer is picking the lens, the aperture, the angle. And a single flash popping in a room makes it a lot harder to find the un-selfconscious subject.

So, our perceptions are visual ones - pictures of things. But it is more complicated than that. "Perception" also means our broader ideas about things. What has been our perception of Hahnemann? Of medicine? Of the people we have met? Of the choices we have made? The pictures on our retinas and brain cells are not really what we mean by our *perceptions* of these things. The pictures go together with our opinions, our feelings and past experiences.

The pictures in this book, taken by one person or another, do not differ nearly as much as the various perceptions that the picture-takers have. In that respect, trying to represent a group's perceptions is futile from the start: Of the thousand or so perceivers who look at it, the yearbook will seem dimly familiar to a few and alien to many.

How This is the concrete part. After all, perception is physiological; it is chemical. Waves and particles of one kind or another are zipping around, some of which bang into our retinas (or eardrums, or Pacinian corpuscles or the itsy bitsy hairs all over us), which makes sodium and potassium want to swim back and forth across wires made of fat to our brains, which sorts it all out so we can think, "oh a chair," or something.

This has been going on at a furious pace all our lives, but particularly so in the last four years. Too many perceptions to sort out neatly. Perceptions of buildings, of streets, of family and friends, teachers, patients, words, lab results. What we choose to look at skews the final result. What we observe alters the observed. Nothing is real unless it is perceived. All of these notions about how we perceive things: Biology, physics, statistics, medicine.

And no time for conclusions. Again, time.

Where Hahnemann University, circa 1986. Philadelphia, Pa. And the surrounding environs.

CONTENTS

Introduction 2

Perceptions

. . . of Philadelphia 4
Perceptions of the city from our vantage point:
Photographs taken from the windows of HU.

. . . of Hahnemann 11

. . . of Classmates 15
The classes of '89, '88 and '87

. . . of Time 33
A more or less chronological look back at four
years years by members of the graduating class.

. . . of Ourselves 66
The class of 1986.

Cover: The cover design was suggested by CT reconstructions, in which several views can be reconstructed from axial CT images. The objects on the cover were photographed nine times from nine successive angles. Any two sequential images, when fused visually, will yield a three-dimensional picture. Some individuals are able to do this with the unaided eye; magnifying lenses (a stereopticon) makes this easier to accomplish.

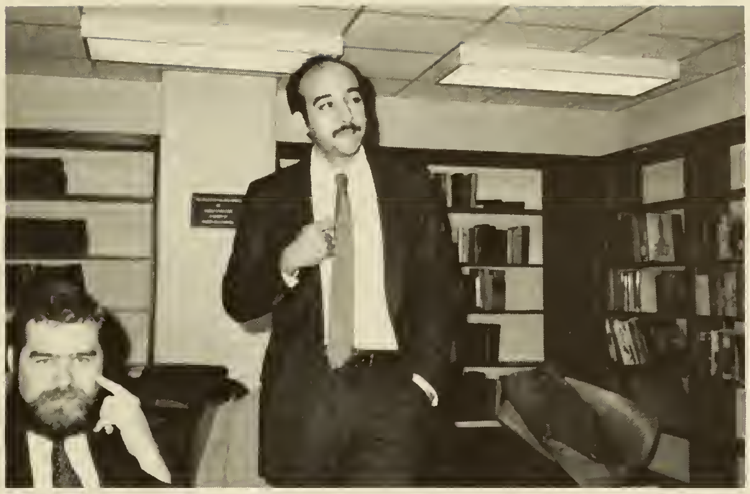
SEVEN STEPS TO MA



unretouched

" . . . and it is one of the fundamental puzzles of the universe we live in that there should indeed be a definite 'arrow of time', a distinction between the past and the future. The uncertainty relations tell us that we cannot know position and momentum at the same time, and therefore we cannot predict the future . . . . The future is inherently uncertain — we do not know exactly where we are going; but the past is clearly defined — we do know exactly where we have come from."

That Man Is A Success

Who has lived well,
laughed often and loved much;

Who has gained the respect
of intelligent men
and the love of children;

Who has filled his niche
and accomplished his task;

Who leaves the world
better than he found it,
whether by an improved poppy,
a perfect poem
or a rescued soul;

Who never lacked appreciation
of earth's beauty
or failed to express it;

Who looked for the best in others
and gave the best he had.

My mind: My bubby whose rare intelligence and beauty gave a new meaning to both life and . . . death which I will bring to all my patients.

My heart and soul: My wife whose love and understanding I have cherished. For tolerating my idiosyncracies (especially around exam time) and redirecting me when I felt lost.

My legs: My parents, whose support maintained my load, gave me firm roots on which to grow, and lastly but not least helped me "foot" the bill.

My arms: My brother, sister, uncles, aunts, in-laws, cousins and friends who are my upper extremities on which to lean.

With gratitude and pride on *our* graduation day!

I close the cab door as I pay
Slinging my bag with thoughless ease
over my shoulder as I turn
I hear the engine fade away
sigh to the dark and disappear
Under this ageless milky away
My liquid moods effortlessly
Pass now from light to dark to light
And seem to mimic silently
The homeward beacon and the breeze
Again the empty platform waits
another crossroad noiselessly
Arises only to remind
How distance changes ceaselessly
The traveller and that he seeks
Not long from now another scene
Will be a shrinking memory
Resigned to this nomadic fate
I've learned to call my home a place
Forever shrinking from my sight
But yet for all the times between
I smile and as I wait I feel
The echoes of a greater stream
Arising with the morning breeze
Chasing the vestiges of night
I've traveled through my darkest dreams
Only to sometimes still arise
Feeling that life may yet provide
Ray filtered roads and quiet rides
And silent greyhounds to the light

Philippians 4:13 NIV

I wish to share my joy with my family and the prayer supporters. Thanks.

Stop being "mean," "bad-tempered" and "angry." Quarreling, harsh words, and dislike of others should have no place in your lives. Stop lying to each other; tell the truth . . . when we lie to each other we are hurting ourselves. If you are angry, don't sin by nursing your grudge. Don't let the sun go down with you still angry — get over it quickly. Don't use bad language. Say only what is good and helpful to those you are talking to. Be kind to each other, tenderhearted, forgiving one another, just as God has forgiven you because you belong to Christ . . . . "Cool"

CONGRATULATIONS AND BEST WISHES
FROM
THE DEPARTMENT OF DIAGNOSTIC RADIOLOGY

THE FACULTY AND STAFF OF THE LIKOFF CARDIOVASCULAR INSTITUTE

Extend Their Heartfelt
Congratulations And Best Wishes
To The Class Of 1986

The William Likoff Cardiovascular Institute
Of The Hahnemann University

CONGRATULATIONS
TO THE
CLASS OF 1986

DEPARTMENT
OF
MEDICINE

At St. Francis Health System, your health is our business.

IT'S COMFORTING TO KNOW THAT when you're sick someone nearby is in the business of caring for you.

St. Francis Medical Center, a component of St. Francis Health System, provides state-of-the-art medical care. Located four miles from downtown Pittsburgh, the hospital offers more than 200 beds in a separate psychiatric facility and the largest Department of Rehabilitation Medicine between Philadelphia and Chicago. New facilities for Emergency and Outpatient Services (including same day surgery) are strengths of its medical-surgical section. A joint venture of nine area hospitals for home care originated at St. Francis. Its Division of Cardiology is the only local program complete with every available diagnostic tool including heart catheterization. As the first hospital in Pittsburgh to treat cancer with a betatron, our oncology program still ranks among the best in the area. The Department of Diagnostic Radiology was the first in the city to add a CT scanner to its battery of equipment. Our ophthalmologists were among the first nationally to implant intraocular lens. The first endourology service in the city for the removal of kidney stones without surgery was opened here. The Chemical Dependency Program is one of the most comprehensive in the nation, treating mothers-to-be, senior citizens, adolescents and adults. St. Francis opened the first Premenstrual Syndrome (PMS) unit in Pittsburgh and an Eating Disorders Unit for adults with anorexia, bulemia and obesity.

The largest medical center in Western Pennsylvania, St. Francis is a teaching hospital with eight residency programs:

- Transitional Program
- Internal Medicine
- Diagnostic Radiology
- Psychiatry
- Oral and Maxillofacial Surgery
- Ophthalmology
- Physical Medicine and Rehabilitation
- A Fellowship in Cardiology

St. Francis also conducts accredited schools for registered nurses, licensed practical nurses, respiratory care technicians and nurse anesthetists.

The only permanence is change. These grand old buildings, students in starched ollars and bow ties are gone. Modern facilities replace the Victorian classics which vere Hahnemann. Denims and cords are the informal attire of the day. But the reatest changes are in the medicine which you have been studying . . . and even reater changes await you as you progress through your residencies into practice. It vill be a challenge to keep up with the new modalities which will continue to be leveloped. Old diseases will be conquered and new ones will become the concern of our day. You have received the best education possible to prepare you to practice in he 21st century . . . to keep up . . . yes, even to lead. This is the challenge of your raduation. God speed . . . good luck . . . and much success in your new endeavors.

THE BOARD OF TRUSTEES, PRESIDENT & ADMINISTRATION OF HAHNEMANN UNIVERSITY
